Products Detail

Gabion Mesh Machine

Product Purpose

SH4300 type gabion mesh machine is one kind of special equipment for twisting metal wire hexagonal mesh with big wire, big mesh and wide breadth. The product has widely purpose, with its good corrosion resistance and oxidation resistance, serves well as strengthening, protection and temperature keeping materials in the form of mesh container, stone cage, isolation wall, boiler cover or poultry fence in construction, petroluem, chemical, breeding, garden and food processing industries.

Characteristics

The machine is composed with main body, wire-wrapper and net-collector. It has the feature of rational design, simple structure, smooth running, excellent performance, reliable operation and convenient maintenance.

The main parts, such as drag plate, rack and half-gear are all made of special material with high quality though processing under advanced technologies.

main constituent part: gabion mesh machine, wire tension device and gabion mesh recoiler,net roll machine,gabion packing machine.

spare parts: wire pay-off(50 sets), spiral making machine, air compressor, lubrication pump etc.

Gabion mesh machine main parameter

mesh size: 50*70/60*80/80*100/100*120/120*150mm

width: 4300mm

wire diameter: 2.0--4.5mm(PVC wire 2.0--5mm)

twister number: 3

rotate speed: 25r/min

power: 22KW

output: 195m/hour

weight: 15T
