Products Detail

Rebar Bending Machine

Parameters:

The maximum diameter of bending bar(mm)	40								
The speed of work plate	7r/min								
Outer size(mm)	800*700*720(L*W*H)								
Machine weight(kg)	400								
Life time (year)	10								
Frame material	steel								
The number of workers needed for operation	1								
quick-wear part	no								
Assembly and cost	Sell after assembled(no other expenses)								
Motor parameters									
Power(KW)	3.0								
Rotate speed	1420r/min								
Voltage(v)	380								
Bending capacity									
Number of the bars		1	2	3	4	5	6	7	8
The tensile strength of the bars	0≤450	40	30	26	22	18	14	10	8
strength	0b≤650	32	26	24	20	18	14	8	6
N/mm2	0b≤850	28	24	20	18	14	12	8	6
